Art Unit: 2833

1. Claim 1 is objected to because the projecting piece 55 of the present device does not "project inwardly from" the circumferential wall 52 of the housing member 50. It extends outwardly from this wall.
2. The examiner appreciates applicant's explanation of the distinction between claims 2 and 3.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1-3 remain rejected under 35 U.S.C. 102(b) as being anticipated by Kato. This mounting structure of a junction box comprises a terminal part 109 of a busbar 107, a housing member 102, and a projecting piece (the section of wall 102 surrounded by the wall 104) projecting inwardly from a circumferential wall 104. The electric contact part 109a of the busbar is inserted into the cavity 105. The terminal part and the housing member form a connector. The tapered faces 109a of the electric contact part are inserted into the cavities by way of the inclined faces 1 in order to correct any potential misalignments.
5. Claims 4 and 5 are allowed.
6. Applicant's amendment necessitated the new ground of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH

shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
